

Tradeasi

Making it easier for people to do business

Retail Tradeasi™

'Twas the month before Christmas and all through the house, all you could hear was the click of a mouse.'

Purchases by consumers over the Internet last year rose by more than 30%, and some retailers have seen their sales via the Web, come close to their 'bricks and mortar' sales, and their profitability rise exponentially. The objective of Retail Tradeasi is to make it as easy as possible for a Seller to have a consumer facing web site, thus maximising their sales without incurring any costs.

Retail Tradeasi – Your own online shop

With no set up costs, Tradeasi Solutions provides all sellers in the industry the opportunity to expose their products to the risk of sale to many more consumers. No Information Technology experience is required, just internet access through a standard PC, and a positive attitude to get involved with this changing world. An ever increasing number of consumers are using the Internet to browse for their requirements, and it is essential that you don't miss out on this rapidly increasing opportunity. As many people have already proved, you don't have to be big to look enormous on the Internet, and you have a flying start as you already have the products in stock to sell. This solution offers unlimited sales growth.

Retail Tradeasi – How it works

Tradeasi Solutions service desk will help to set up your own domain name, and initial home screen, and then with your connections through the Company Tradeasi website, you specify which products you wish to sell on your internet site, and at what retail price, and Tradeasi does the rest. We upload all the product information from our central product database, and within minutes, you have your own web site operating.

Tradeasi Solutions will then invoice you a small percentage (less than 1%) of the value of the orders that have been placed through the system, and you take the payment and arrange the delivery to the customer. We hold the customers details on our database, so that we can run a marketing campaign on your behalf, if you want to encourage more sales from consumers.
